

Student Discount and College Credit

Q. How can I get a college student discount for the online Foundations course?

To get a student discount for "[The Foundations of Wildlife Chemical Capture](#)" online course, email Dr. Mark at info@wildliferesources.com identifying your college with proof of being a student such as with a college email address. Dr. Mark will send you a coupon to reduce the Foundations course fee to \$500 (save \$80).

The coupon link will take you to the Checkout Page with your discount to purchase the Foundations course. Or [go here to register without a discount](#).

Q. Can faculty receive the discount as well for the online Foundations course?

Yes, faculty are encouraged to contact me for the discount. The Foundations course cannot be used to teach others, but it is valuable professional development and provides 16 hours for the TWS Professional Development Program.

Q. How can I get college credit for GWR's online Foundations course?

Here are two options.

- 1) Contact your advisor and ask if you can take this course for Independent Study.
- 2) Global Wildlife Resources (GWR) has coordinated with University of Montana's Extended Credit officer so students can receive one (1) undergraduate semester credit. The course will be listed as WILD 391 Foundations of Wildlife Chemical Capture on a University of Montana transcript. It uses Credit/No Credit (pass/fail) grading.

It is the student's responsibility to verify the transferability of courses to their degree-granting institution and intended major.

Anyone can enroll for one Univ. of Montana college credit after they register and pay for the Foundations course. Here is how to enroll:

1. Get a College Student Discount! Simply ask Dr. Mark as described above. You don't have to have a student discount to enroll. You can also enroll if you pay the general fee for the course.
2. Use the coupon to register and pay for the Foundations course. The student coupon link will take you to the Checkout Page.
3. Attend the course. This is self-paced with Dr. Mark's interactive support. Access for a year.
4. After completing the course, submit a UM Credit Registration Form and a payment of \$155 for the college credit fee to Holly Kulish (Holly.Kulish@mso.umt.edu) at University of Montana. UM will enroll you for credit & send a confirmation email.
5. Upon finishing the course, notify Holly and Dr. Mark. Dr. Mark will submit your final grade to UM.

Any questions? Contact Dr. Mark or Holly Kulish for a UM Credit Registration Form.
